

As we can see from the skimming device there are 29 deleted files and 12 of them are jpg files and one of them is pdf and the 13 of them are located in the CarvedFiles folder and the rest in the Unalloc folder. In the CarvedFiles folder the pdf shows a ticket that was purchased at the 20/05/1941 in the name of Arnim Zola and the train is going from Lausanne (Switzerland) which is the place the device was found to the Aosta. So maybe it's a way for the thief to escape from Switzerland before he gets caught and we know his name and the tickets ID.

Most of the other pictures are just some view of a mountain or a house but there are 4 pictures of the same guy which might be the face of the thief

and also there is a picture with a red and black symbol.
